Academic Career:

Lecturer & Researcher at FPT University (Full Time)	<p>Teaching courses: Programming Fundamentals (C Language); Object Oriented Programming (Java); Data Structures and Algorithms; Digital Image Processing; Advanced Computer Vision; Programming for Robotics; Robotics: Perception; Introduction of Deep Learning.</p> <p>Research Areas: Computer vision, deep learning, robotics.</p>
<p>Ph.D in Computer Science, Örebro University, Sweden.</p> <p>website</p> <p>Centre for Applied Autonomous Sensor Systems (AASS).</p>	<p>Thesis: <i>Vision-based Perception For Autonomous Robotic Manipulation.</i> web PDF</p> <p>Research interests: <i>My research interests lie at the intersection of computer vision, robotics, and machine learning. I am particularly interested in topics involving autonomy for robots, with a focus on perception algorithms.</i></p> <p>ILIAD Project: <i>a key member of the EU-funded research project Iliad.</i> website code video video video</p>
Research Assistant at National Taiwan University (NTU)	<p>Project 1: Automated 3D pick & place and key dimension inspection on randomly stacked workpieces. video video</p> <p>Project 2: 3D surface reconstruction and automated robotic inspection system. video</p>
Master of Science	<p>Master of Science in Automation Technology from National Taipei University of Technology (NTUT).</p> <p>Thesis: Multi-View 3-D surface digitization using Automated robot scanning and image registration. video video</p>
Engineering Program (HUST)	<p>5-year Engineering Program, Control and Automation Engineering, Hanoi University of Science and Technology.</p>

Research Skills:

- Practical experience in C/C++, python, ROS, Gazebo.
- Strong familiarity with 2D image and 3D point cloud processing algorithms.
- Research experience in deep learning, familiarity with Pytorch.
- Solid theoretical background of the basic concepts in robotics, computer vision, and deep learning.

Awards and Honors:

- Fully Funded PhD Program in Computer Science, Orebro University, Sweden.
- National Taiwan University Regulations Governing Academic Research Fellowship for Outstanding International Graduate Students.
- 2016 CTCI Scholarship for Oversea Graduate Students in Taiwan.
- Award for being ranked 1st among the master students graduated at the Institute of Automation Technology, National Taipei University of Technology.
- The second place of Intelligent Automation Equipment Invention Award 6th, Taiwan.
- Best Poster Award at International Conference on Inventions (ICI).
- The honorable award of Robot Competition for innovative smart application on industrial robot, Taiwan.
- National Taipei University of Technology Scholarship for Outstanding International Master's Students.

Recent Publications

Conference Rank A*:

1. Hoang, D. C., Stork, J. A., & Stoyanov, T. (2022). Voting and Attention-based Pose Relation Learning for Object Pose Estimation from 3D Point Clouds. *The 2022 IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS 2022)*, Kyoto, Japan, October 23-27, 2022. [PDF](#)

2. Hoang, D. C., Stork, J. A., & Stoyanov, T. (2022). Context-Aware Grasp Generation in Cluttered Scenes. *IEEE International Conference on Robotics and Automation (ICRA 2022)*, Philadelphia, USA, May 23-27, 2022. [PDF](#)

3. Hoang, D. C., Lilienthal, A. J., & Stoyanov, T. (2020). Panoptic 3D Mapping and Object Pose Estimation Using Adaptively Weighted Semantic Information. *IEEE International Conference on Robotics and Automation (ICRA 2020)*, Paris, France, May 31-Jun 4, 2020. [PDF](#) [code](#) [video](#)

ISI/SCOPUS Q1:

4. Hoang, D.C., Stork, J.A. and Stoyanov, T., 2022. Voting and Attention-Based Pose Relation Learning for Object Pose Estimation From 3D Point Clouds. *IEEE Robotics and Automation Letters*, 7(4), pp.8980-8987. [PDF](#)

5. Hoang, D. C., Lilienthal, A. J., & Stoyanov, T. (2020). Object-RPE: Dense 3D reconstruction and pose estimation with convolutional neural networks. *Robotics and Autonomous Systems (RAS)*, 133, 103632. [PDF](#) [code](#) [video](#)

6. Hoang, D. C., Lilienthal, A. J., & Stoyanov, T. (2020). Panoptic 3D Mapping and Object Pose Estimation Using Adaptively Weighted Semantic Information. *IEEE Robotics and Automation Letters (RAL)*, 5(2), 1962-19. [PDF](#) [code](#) [video](#)

7. Hoang, D. C., Chen, L. C., & Nguyen, T. H. (2016). Sub-OBB based object recognition and localization algorithm using range images. *Measurement Science and Technology*, 28(2), 025401. [PDF](#) [code](#) [video](#)

ICRA, RAL, and RAS are top conferences and journals in robotics and artificial intelligence. Sources: [google scholar](#) and [scimagojr](#).
